

### **SCARF with a central weave part**

Cast on 43 stitches on the needles 3,5 or 4.

Knit for the length of 20 cm in the moss stitch on all the 43 stitches.

But always knit the first stitch in this scarf pattern, please, to end up with better or smoother scarf sides.

Then divide your work in groups of 7 stitches each and knit these groups in stockinette stitch for a 15 cm length (always knit the first stitches).

Now put all the 43 stitches back on the same needle and knit in the moss stitch for another length of 50 cm.

Then divide the stitches again in groups of 7 stitches each and knit these groups for 15 cm in stockinette, putting the stitches at the end on safety pins.

Now weave these two knitted groups of 7 stitches across each other and control they are laying flat (in the right direction) before you put them again on the same needle.

Knit again in the moss stitch for further 20 cm length and your scarf is ready.

Sew away the threads left.

Thx to Lia for the translation
