

Start with 3 colors. Each "block" is 9 stitches so for however wide you want the blanket, count in 9 to get your foundation (and always make it an uneven number of "blocks) eg: 19 blocks(makes it about 5' long) $19 \times 9 = 171$ stitches then add 4 = 175 sc for the foundation row.

Row 1-2: Sc, switch to next color Row 3: sc 2 stitches, * front post double crochet(look it up), sc, until you have 5 posts, sc 9, then repeat post pattern(5 posts, 4 sc=9)(9sc), 2 sc (there is 2 sc at each end) Row 4: sc, switch to next color

Repeat row 3-4 until you have 7 rows of posts

Then switch the pattern to: Row 1: sc 11 stitches, then start pattern Row 4: sc, switch to next c

So you will have your "blocks" of (5 posts & 4sc) and (9sc) with 2 sc at each end.

Im not a pattern writer :) i hope its not too confusing. Please post if you have any questions!

Huge Thanks to Author Firejen For Pattern And Photo
